

Pipe Decoiler

Max length of the pipe coil:	600m
Max weight of the pipe coil:	75kg
Weight:	17.5kg
Material:	Steel

A pipe coil is placed on a decoiler allowing simple pipe uncoiling while subsequent pipe sections are laid

Pipe Bend Support

The bend support is used for supporting pipes to make a smooth 90-degree turn where needed & provides a rigid bend which changes the pipes direction without causing excessive bending

Pipe Calibrator

Allows you to prepare underfloor heating pipes for connections and pipe fittings

Pipe Cutters

Up to 25mm Pipe cutter

Up to 36mm Pipe Cutter

Allows you to prepare underfloor heating pipes for connections and pipe fittings

Euroconous Connectors

16 x 2mm Pipes

Used to connect the Pex-a, PERT & Al/PE-RT pipe to the manifold flow and return connections
